

EMAILGUARD AI

EMAIL FORENSIC INTELLIGENCE REPORT

EXECUTIVE SUMMARY

CRITICAL THREAT DETECTED. The analyzed email contains multiple indicators associated with phishing, business email compromise, impersonation, suspicious URLs and failed email authentication.

1. CASE INFORMATION

Case ID	EM-20260823154030
File Name	phishing.eml
Analysis Timestamp	2026-08-23T10:10:30.764202

2. RISK ASSESSMENT

Risk Score	100 / 100
Classification	CRITICAL
Threat Types	PHISHING, IMPERSONATION, SOCIAL_ENGINEERING

3. EMAIL INFORMATION

From	security@paypa1-security.com
From Email	security@paypa1-security.com
To	victim@example.com
Reply-To	support.verify@gmail.com
Reply-To Email	support.verify@gmail.com
Return-Path	<support@paypa1-security.com>
Subject	Urgent: Verify Your Account Immediately
Message-ID	<phishing-123456@example.com>

4. EMAIL AUTHENTICATION

Mechanism	Result
SPF	FAIL
DKIM	FAIL

DMARC	FAIL
-------	------

5. NETWORK AND ORIGIN ANALYSIS

Extracted IPs	185.100.50.25
IP Address	185.100.50.25
Country	Pending API
Region	Pending API
City	Pending API
ISP	Pending API
Organization	Pending API
Latitude	Pending API
Longitude	Pending API
Lookup Status	PENDING_API

Received Header Chain

Hop 1: from suspicious-server.example.com (185.100.50.25) by mail.example.com; Sat, 22 Aug 2026 15:30:00 +0530

6. URL ANALYSIS

URL 1: http://paypa1-security.example/verify

Suspicious URLs

URL: http://paypa1-security.example/verify

Domain: paypa1-security.example

- Contains security/account related keywords: verify, security

7. THREAT INDICATORS

- SPF authentication failure detected
- DKIM authentication failure detected
- DMARC authentication failure detected
- Suspicious URL characteristics detected
- Sender and Reply-To addresses do not match
- Urgency-based social engineering indicators detected
- 1 IP address(es) extracted from email headers

8. RISK FACTOR BREAKDOWN

Indicator	Points
SPF authentication failed	25

Indicator	Points
DKIM authentication failed	20
DMARC authentication failed	25
1 suspicious URL(s) detected	10
Reply-To address differs from sender address	15
Urgent/social-engineering language detected	10

9. FORENSIC ASSESSMENT

The analyzed email exhibits multiple high-risk indicators consistent with phishing, impersonation or business email compromise. Immediate security review and containment is recommended.

Important: Geolocation results identify the approximate location of observed network infrastructure. They do not establish the physical location or identity of the human attacker.

10. DIGITAL EVIDENCE

SHA-256	8bc7ee9d9913e9664d6468ada5af375ee00e43d526ad966507ccbda670b8292
Integrity Status	VERIFIED
Evidence Timestamp	2026-08-23T10:10:30.764140

11. RECOMMENDED ACTION

- Do not click links contained in the email.
- Do not reply to the sender.
- Quarantine the email.
- Block or investigate suspicious sender domains.
- Investigate the originating IP and infrastructure.
- Verify the request through an independent trusted channel.

DISCLAIMER

This report is automatically generated by EmailGuard AI for cybersecurity analysis and investigative support. The findings represent technical indicators and confidence-based assessments. They should not be treated as definitive identification of an individual attacker. Human analyst review is recommended before legal, administrative or enforcement action.
